YUPO®XAB

WATERBASED INKJET

YUPO XAB is YUPO's newest development for waterbase inkjet printing. Its new special formulated coating can be used for either dye or pigment inks. YUPO XAB 1029 combines the durability and water resistance of YUPO synthetic papers with a high quality coating to achieve the best printing quality. The matte surface gives a nice contrast with the brilliant inkjet colors. The coating's outdoor and water resistance are excellent and ensure a long-lasting image. YUPO XAB is 100% recyclable.

PRODUCT YUPO®XAB

GRADE	THICKNESS MICRONS	GRAMMAGE G/M ²	PRINTING METHOD
XAB 1020	135	90	Waterbased Inkjet

MACHINE COMPATIBILITY

YUPO XAB works well with most waterbase inkjet machines, either pigment or dye machines. For additional information, please contact our technical service department.

SOLVENT, ECO-SOLVENT AND HP LATEX

YUPO® VJFM 170 and YUPO®XAB 1029 are not only durable but can also be printed with solvent, eco-solvent, UV and HP Latex inks. YUPO® VJFM 170 and YUPO® XAB 1029 combine the strength of YUPO® synthetic paper with a semiglossy smooth coating that gives a nice and brilliant image. The outdoor and water resistance are excellent and ensure a long-lasting image. YUPO VJFM and XAB are 100% recyclable.

PRODUCT YUPO®VJFM 170 & YUPO®XAB1029

GRADE	THICKNESS MICRONS	GRAMMAGE G/M ²	PRINTING METHOD
VJFM 170	170	146	Solvent, Eco Solvent, HP-Latex
XAB 1029	245	205	Solvent, Eco Solvent, HP-Latex

MACHINE COMPATIBILITY

YUPO® VJFM 170 and YUPO®XAB 1029 work well with most of the solvent and low-solvent inkjet machines in the market, as well as all the UV machines and with HP Latex L25500, L65500, LX600 and LX800. For additional information, please contact our technical service department.

PRINTED ON YUPO® YPI 250.

SILKSCREEN AND DIGITAL UV PRINTING

YUPO®FPU combines the strengths of YUPO® synthetic paper, such as durability and water resistance, with a smooth and strong surface for a high quality and durable image when using silkscreen or UV digital. The matte surface gives a nice contrast with the brilliant colors. The outdoor and water resistance are excellent and ensure a long-lasting image. YUPO FPU will not curl when used as posters or roll up banners and will remain flat for long time. YUPO FPU is 100% recyclable and during its manufacturing process no harmful gases are generated.

PRODUCT YUPO®FPU

GRADE	THICKNESS MICRONS	GRAMMAGE G/M ²	PRINTING METHOD
FPU 130	130	100	Silkscreen and UV Digital
FPU 200	200	158	Silkscreen and UV Digital
FPU 250	250	200	Silkscreen and UV Digital

MACHINE COMPATIBILITY

YUPO®FPU works well with all the UV digital print machines in the market. When YUPO FPU is printed with HP Scitex TurboJet 8500, it is not recommended to be used outdoors. For additional information, please contact our technical service department.

REELS YUPO®FPU

GRADE	SIZES MM x M

TRANSLUCENT GRADES FOR UV DIGITAL PRINTING

YUPO® RUU 400 and YUPO® BLU 150 are YUPO's translucent/backlit products for UV digital printing. YUPO® RUU 400 is a thick translucent PP sheet ideal for outdoor backlight posters and to substitute Polycarbonate and HIPS. YUPO® BLU 150 is a thin PP material for glass or acrylic backlights. Both products have an excellent light diffusion and the light bulbs cannot be seen combined with an excellent printability and durability. YUPO RUU and BLU are 100% recyclable.

PRODUCT YUPO®RUU & YUPO®BLU

GRADE	THICKNESS MICRONS	GRAMMAGE G/M ²	PRINTING METHOD
RUU 400	400	394	UV Digital
BLU 150	150	158	UV Digital

MACHINE COMPATIBILITY

YUPO® RUU 400 can only be printed on UV flat bed machines and YUPO®BLU 150 works well on most UV digital machines. For additional information, please contact our technical service department.

YUPO BLOCKOUT FOR UV DIGITAL PRINTING

YUPO BLOCKOUT is YUPO's new product for UV digital printing. When high opacity and bright whiteness is needed, YUPO BLOCKOUT is the best solution. Easy to print with UV digital machines, with an excellent durability, with anti-curl effect and extreme lightweight, YUPO BLOCKOUT is ideal for both side printed banners.

PRODUCT YUPO®BLOCKOUT

GRADE	THICKNESS MICRONS	GRAMMAGE G/M ²	PRINTING METHOD
YBOPU 130	305	260	UV Digital

MACHINE COMPATIBILITY

YUPO BLOCKOUT works well on most UV digital machines. For additional information, please contact our technical service department.
